

Contract Malting Position Statement:

The North American Craft Maltsters Guild (NACMG) Board of Directors understands the need for off-site contract malting during the early stages of business development and/or market testing. In order to manage these relationships in accordance with our by-laws we require that the below guidelines be followed:

- All contract malting projects must be conducted with a Member Malthouse.
- All contract malting arrangements shall not exceed 24 months in duration.
- Both parties must be Member Malthouse and/or Developing Malthouse members in good standing with NACMG.
- Both parties must be transparent with regards to the origin of the grain utilized in the project.

These rules govern our Members and if a Member cannot abide by them then they cannot maintain membership with the North American Craft Maltsters Guild.
